

ECCB10

Ghent, Belgium

9th European Conference
on Computational Biology

September 26-29, 2010

Join us in Ghent for ECCB10!

ECCB10 is the key European computational biology event in 2010 uniting scientists working in a broad range of disciplines, including bioinformatics, computational biology, biology, medicine and systems biology. Part of the ECCB conference series, it will be organized this year jointly by the Belgian and Dutch bioinformatics communities.

Leading bioinformatics researchers, computational biologists, and bio-IT professionals from Europe and around the world gather annually at the European Conference on Computational Biology (ECCB) for four days of presentations, poster sessions, workshops, software demonstrations, and most importantly—networking. ECCB is the leading European meeting and a primary international conference at which people report on and discuss advances in this rapidly-expanding field.

Ghent is one of Europe's most exciting medieval towns, a glorious eclectic city with spectacular buildings and a vivid cultural experience (National Geographic Traveler ranked it 3rd best historic place to visit internationally in 2008). Ghent is directly accessible by train from Brussels airport. The conference venue is highly convenient and located in a beautiful park within the city center.

We look forward to welcoming you to Ghent.

The ECCB10 Organizing Committee

Invited Speakers

Peer Bork (EMBL-Heidelberg)

Elaine Mardis (Washington University)

Michael Sternberg (Imperial College London)

Hans Westerhoff (University of Manchester, Free University of Amsterdam)

Yves Van de Peer (University of Ghent)

Key Dates

April 9, 2010

- Paper submission deadline

May 7, 2010

- Registration open

June 3, 2010

- Industry and demo track
submission deadline

June 20, 2010

- Poster submission deadline

June 25, 2010

- Travel fellowship application
deadline

August 13, 2010

- Early registration deadline

Local Organizing Committee

Yves Moreau (Chair) (University of Leuven)

Jaap Heringa (Free University of Amsterdam)

Gert Vriend (Radboud University)

Yves Van de Peer (University of Ghent)

Kathleen Marchal (University of Leuven)

Jacques van Helden (Université Libre de Bruxelles)

Louis Wehenkel (Université de Liège)

Antoine van Kampen (University of Amsterdam)

Peter van der Spek (Erasmus MC)
